1. Aims

Our school aims to:

- Provide and maintain a safe and healthy environment
- Establish and maintain safe working procedures amongst staff, pupils and all visitors to the school site
- Have robust procedures in place in case of emergencies
- Ensure that the premises and equipment are maintained safely, and are regularly inspected

2. Legislation

This policy is based on advice from the Department for Education on [health and safety in schools](#) and the following legislation:

- [The Health and Safety at Work etc. Act 1974](#), which sets out the general duties employers have towards employees and duties relating to lettings
- [The Management of Health and Safety at Work Regulations 1992](#), which require employers to make an assessment of the risks to the health and safety of their employees
- [The Management of Health and Safety at Work Regulations 1999](#), which require employers to carry out risk assessments, make arrangements to implement necessary measures, and arrange for appropriate information and training
- [The Control of Substances Hazardous to Health Regulations 2002](#), which require employers to control substances that are hazardous to health
- [The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations \(RIDDOR\) 2013](#), which state that some accidents must be reported to the Health and Safety Executive and set out the timeframe for this and how long records of such accidents must be kept
- [The Health and Safety \(Display Screen Equipment\) Regulations 1992](#), which require employers to carry out digital screen equipment assessments and states users' entitlement to an eyesight test
- [The Gas Safety \(Installation and Use\) Regulations 1998](#), which require work on gas fittings to be carried out by someone on the Gas Safe Register
- [The Regulatory Reform \(Fire Safety\) Order 2005](#), which requires employers to take general fire precautions to ensure the safety of their staff
- [The Work at Height Regulations 2005](#), which requires employers to protect their staff from falls from height

The school follows [national guidance published by Public Health England](#) when responding to infection control issues.

3. Roles and responsibilities

3.1 The governing board

The governing board has ultimate responsibility for health and safety matters in the school, but will delegate day-to-day responsibility to the head teacher.

The governing board has a duty to take reasonable steps to ensure that staff and pupils are not exposed to risks to their health and safety. This applies to activities on or off the school premises.

The governing body, as the employer, also has a duty to:

- Assess the risks to staff and others affected by school activities in order to identify and introduce the health and safety measures necessary to manage those risks
- Inform employees about risks and the measures in place to manage them
- Ensure that adequate health and safety training is provided

The governor who oversees health and safety is **Adrian Dennis**.

3.2 Headteacher

The headteacher is responsible for health and safety day-to-day. This involves:

- Implementing the health and safety policy
- Ensuring there is enough staff to safely supervise pupils
- Ensuring that the school building and premises are safe and regularly inspected
- Providing adequate training for school staff

- Reporting to the governing body on health and safety matters
- Ensuring appropriate evacuation procedures are in place and regular fire drills are held
- Ensuring that in their absence, health and safety responsibilities are delegated to another member of staff
- Ensuring all risk assessments are completed and reviewed
- Monitoring cleaning contracts, and ensuring cleaners are appropriately trained and have access to personal protective equipment, where necessary

In the headteacher's absence, the deputy designated safeguarding lead assumes the above day-to-day health and safety responsibilities.

3.3 Health and safety lead

The nominated health and safety lead is **Mrs. Patricia Oliver**.

The deputy designated safeguarding lead is **Mr Nigel Dayes**

3.4 Staff

School staff have a duty to take care of pupils in the same way that a prudent parent would do so.

Staff will:

- Take reasonable care of their own health and safety and that of others who may be affected by what they do at work
- Co-operate with the school on health and safety matters
- Work in accordance with training and instructions
- Inform the appropriate person of any work situation representing a serious and immediate danger so that remedial action can be taken
- Model safe and hygienic practice for pupils
- Understand emergency evacuation procedures and feel confident in implementing them

3.5 Pupils and parents

Pupils and parents are responsible for following the school's health and safety advice, on-site and off-site, and for reporting any health and safety incidents to a member of staff.

3.6 Contractors

Contractors will agree health and safety practices with the headteacher before starting work. Before work begins the contractor will provide evidence that they have completed an adequate risk assessment of all their planned work.

4. Site security

Patricia Oliver is responsible for the security of the school site in and out of school hours. They are responsible for visual inspections of the site, and for the intruder and fire alarm systems.

Patricia Oliver is a key holder and will respond to an emergency.

5. Fire

Emergency exits, assembly points and assembly point instructions are clearly identified by safety signs and notices. Fire risk assessment of the premises will be reviewed regularly.

Emergency evacuations are practised at least once a term.

The fire alarm is a loud continuous bell.

Fire alarm testing will take place once a week.

New staff will be trained in fire safety and all staff and pupils will be made aware of any new fire risks.

In the event of a fire:

- The alarm will be raised immediately by whoever discovers the fire and emergency services contacted. Evacuation procedures will also begin immediately
- Fire extinguishers may be used by staff only, and only then if staff are trained in how to operate them and are confident they can use them without putting themselves or others at risk
- Fire drills will be conducted periodically as well as when there is a new student or member of staff.
- Staff and pupils will congregate at the assembly point. This is beside the pedestrian gate in the CACFO UK carpark.
- Staff will take a register of pupils, which will then be checked against the attendance register of that day
- The headteacher or designated safeguarding lead will take a register of all staff
- Staff and pupils will remain outside the building until the emergency services say it is safe to re-enter

The school will have special arrangements in place for the evacuation of people with mobility needs and fire risk assessments will also pay particular attention to those with disabilities.

A fire safety checklist can be found in appendix 1.

6. COSHH

Schools are required to control hazardous substances, which can take many forms, including:

- Chemicals
- Products containing chemicals
- Fumes
- Dusts
- Vapours
- Mists
- Gases and asphyxiating gases
- Germs that cause diseases, such as leptospirosis or legionnaires disease

Control of substances hazardous to health (COSHH) risk assessments are completed by Croydon Council and circulated to all employees who work with hazardous substances. Staff will also be provided with protective equipment, where necessary.

Our staff use and store hazardous products in accordance with instructions on the product label. All hazardous products are kept in their original containers, with clear labelling and product information.

Any hazardous products are disposed of in accordance with specific disposal procedures.

Emergency procedures, including procedures for dealing with spillages, are displayed near where hazardous products are stored and in areas where they are routinely used.

6.1 Gas safety

- Installation, maintenance and repair of gas appliances and fittings will be carried out by a competent Gas Safe registered engineer
- Gas pipework, appliances and flues are regularly maintained
- All rooms with gas appliances are checked to ensure that they have adequate ventilation

7. Equipment

- All equipment and machinery is maintained in accordance with the manufacturer's instructions. In addition, maintenance schedules outline when extra checks should take place
- When new equipment is purchased, it is checked to ensure that it meets appropriate educational standards

- All equipment is stored in the appropriate storage containers and areas. All containers are labelled with the correct hazard sign and contents

7.1 Electrical equipment

- All staff are responsible for ensuring that they use and handle electrical equipment sensibly and safely
- Any pupil or volunteer who handles electrical appliances does so under the supervision of the member of staff who so directs them
- Any potential hazards will be reported to Patricia Oliver immediately
- Permanently installed electrical equipment is connected through a dedicated isolator switch and adequately earthed
- Only trained staff members can check plugs
- Where necessary a portable appliance test (PAT) will be carried out by a competent person
- All isolators switches are clearly marked to identify their machine
- Electrical apparatus and connections will not be touched by wet hands and will only be used in dry conditions
- Maintenance, repair, installation and disconnection work associated with permanently installed or portable electrical equipment is only carried out by a competent person

7.2 PE equipment

- Pupils are taught how to carry out and set up PE equipment safely and efficiently. Staff check that equipment is set up safely

7.3 Display screen equipment

- All staff who use computers daily as a significant part of their normal work have a display screen equipment (DSE) assessment carried out. 'Significant' is taken to be continuous/near continuous spells of an hour or more at a time
- Staff identified as DSE users are entitled to an eyesight test for DSE use upon request, and at regular intervals thereafter, by a qualified optician (and corrective glasses provided if required specifically for DSE use)

8. Lone working

Lone working may include:

- Late working
- Home or site visits
- Weekend working
- Site manager duties
- Site cleaning duties
- Working in a single occupancy office

Potentially dangerous activities, such as those where there is a risk of falling from height, will not be undertaken when working alone. If there are any doubts about the task to be performed then the task will be postponed until other staff members are available.

If lone working is to be undertaken, a colleague, friend or family member will be informed about where the member of staff is and when they are likely to return.

The lone worker will ensure that they are medically fit to work alone.

9. Working at height

We will ensure that work is properly planned, supervised and carried out by competent people with the skills, knowledge and experience to do the work.

In addition:

- Pupils are prohibited from using ladders
- Staff will wear appropriate footwear and clothing when using ladders
- Contractors are expected to provide their own ladders for working at height
- Before using a ladder, staff are expected to conduct a visual inspection to ensure its safety
- Access to high levels, such as roofs, is only permitted by trained persons

10. Manual handling

It is up to individuals to determine whether they are fit to lift or move equipment and furniture. If an individual feels that to lift an item could result in injury or exacerbate an existing condition, they will ask for assistance.

The school will ensure that proper mechanical aids and lifting equipment are available in school, and that staff are trained in how to use them safely.

Staff and pupils are expected to use the following basic manual handling procedure:

- Plan the lift and assess the load. If it is awkward or heavy, use a mechanical aid, such as a trolley, or ask another person to help
- Take the more direct route that is clear from obstruction and is as flat as possible
- Ensure the area where you plan to offload the load is clear
- When lifting, bend your knees and keep your back straight, feet apart and angled out. Ensure the load is held close to the body and firmly. Lift smoothly and slowly and avoid twisting, stretching and reaching where practicable

11. Off-site visits

When taking pupils off the school premises, we will ensure that:

- Risk assessments will be completed where off-site visits and activities require them e.g. travel on foot, public transport, the theatre etc.
- Risk assessments are completed for individual pupils
- All off-site visits are appropriately staffed
- Staff will take a school mobile phone, a portable first aid kit, information about the specific medical needs of pupils along with the parents' contact details
- There will always be at least one first aider on school trips and visits
- In the event of an accident the appropriate first aid is administered, parents are contacted
- In the case of a concussion, see Section 12.

12. Concussion

Concussion is a temporary injury to the brain caused by a bump, blow or jolt to the head. It can happen at any time, anywhere, e.g. during sports or in the school playground. Staff will ensure that simple steps are taken to avoid concussion such making sure contact sports for pupils are supervised by a properly qualified and trained person.

Concussion usually only lasts up to few days or weeks, although it sometimes needs emergency treatment and some people can have longer-lasting problems. Signs of a concussion usually appear within a few minutes or hours of a head injury. But occasionally they may not be obvious for a few days, so it's important for staff to look out for any problems in the days following a head injury at the school.

The NHS advises that symptoms include:

- a headache that doesn't go away or isn't relieved with painkillers
- dizziness
- feeling sick or vomiting

- feeling stunned, dazed or confused
- memory loss – you may not remember what happened before or after the injury
- clumsiness or trouble with balance
- unusual behaviour – you may become irritated easily or have sudden mood swings
- changes in your vision – such as blurred vision, double vision or "seeing stars"
- being knocked out or struggling to stay awake

The NHS advises that concussion can be **treated at home** if the person affected only has mild symptoms that don't last long after a head injury, such as:

- a headache that goes away on its own or is relieved by painkillers
- slight dizziness
- feeling sick
- being a bit dazed

Where this is judged the case for a pupil, staff will alert the parents, ensure that the child gets home safely (collected by parents or otherwise) with a letter explaining the position to parents. In the event of uncertainty about a concussion incident, staff will Call NHS 111 for advice on medical help.

The NHS advises that a concussion should be treated at the nearest **accident and emergency (A&E)** department to be checked by a health professional trained in assessing head injuries if a person with an injury to the head has:

- woken up after being knocked out
- problems with your memory
- a headache that doesn't go away
- been vomiting since the injury
- changes in your behaviour, such as becoming more irritable
- had an operation on your brain in the past or are taking blood-thinners (like warfarin)
- been drinking alcohol or taking recreational drugs

The NHS further advises that **999 is used to call for an ambulance** if someone has injured their head and has:

- been knocked out and hasn't woken up
- difficulty staying awake
- problems with understanding, speaking, writing, walking or balance
- numbness or weakness in part of their body
- problems with their vision
- clear fluid coming from their ears or nose
- bleeding from their ears or bruising behind one or both ears
- a black eye with no obvious damage around the eyes
- a fit (seizure)
- hit their head in a serious accident, such as a car crash
- Also call for an ambulance if someone needs to go to hospital but you can't get them there safely.

CACFO Education staff will follow the above NHS advice in the event of head injuries at school, alerting parents straightway to the situation and requiring their involvement as appropriate as well as writing to them report what happened.

13. Lettings

This policy applies to lettings. Those who hire any aspect of the school site or any facilities will be made aware of the content of the school's health and safety policy, and will have responsibility for complying with it.

14. Violence at work

Definitions

Workplace violence is 'any incident where persons are abused, threatened or assaulted in circumstances relating to their work'. This includes colleagues, children, parents or visitors. This means:

- Physical violence –kicking, spitting, hitting, pushing, use of weapons;
- Verbal abuse –shouting, swearing, insults, racial or sexual abuse;
- Threats and intimidation

No physical attack or injury needs to have occurred for a common assault to have taken place. It is sufficient for a person to have been threatened with immediate violence and put in fear of a physical attack for an offence to have been committed. Individual circumstances will influence the decision as to whether a particular incident should be reported to the police. The police would expect to be involved where there is clear injury (whether physical or emotional) and acknowledge that other factors may need to be taken into account such as the previous behaviour of the offender and the likelihood of a repetition if action is not taken to prevent it.

CACFO Education's policy is that staff should not be in any danger at work and violent or threatening behaviour towards our staff will not be tolerated.

Measures to Avoid, Prevent and Minimise Incidents

The headteacher has the primary responsibility in the school to ensure that staff are protected. Staff are advised in the event of an incident, to:

- Speak calmly and without raising their voice
- Be assertive but not aggressive
- Be polite but firm
- Seek assistance
- Think about an escape route, should the need arise
- Walk away

In the event of an emergency, staff should request assistance from the nearest member of staff. All parties involved should take into account the needs, views, feelings and wishes of the victim at every stage. The school will ensure that sympathetic and practical help, support and counselling are made available to the victim at the time of the incident and subsequently.

Staff are advised to keep a mobile phone with a nearby contact, if working alone. 999 should always be called when the immediate attendance of police is required. Police support the use of 999 in all cases where:

- There is danger to life
- There is a likelihood of violence
- An assault is or is believed to be, in progress
- The offender is on the premises
- The offence has just occurred and an early arrest is likely

Where the incident is not thought to be an emergency but police involvement is nevertheless required, the police should be contacted on 101 so that an incident can be logged for possible future reference.

Individual risk assessments are completed for all pupils on admission to the school and are updated at intervals. These are used to inform further risk assessments for on and off-site activities including sporting activities.

Our core staff have over 40 years of experience in dealing with young people with difficult and challenging behaviour and are adept at dealing with most situations which may arise.

Pupils are continually being monitored and supervised by staff and the correct staff/pupil ratio is always adhered to.

Recording and reporting Incidents

Staff will report any incidents of aggression or violence directed to themselves to the headteacher immediately. This includes violence from pupils, visitors or other staff. The recording and reporting of incidents enable the school and employees:

- To meet statutory duties in compliance with the Health and Safety at Work Act and Regulations, the reporting of injuries, Diseases and Dangerous occurrences Regulation (RIDDOR) and Social Security Regulations.
- To collect evidence which may later be necessary if proceedings are brought against an alleged assailant.
- To assist the insurers should any claim for compensation be made
- To help in reviewing policies and informing future risk assessments.

The recording and reporting of incidents should be made on an incident report form (appendix 2).

15. Smoking

Smoking is not permitted anywhere on the school premises.

16. Infection prevention and control

We follow national guidance published by Public Health England (PHE) when responding to infection control issues. We will encourage staff and pupils to follow this good hygiene practice, outlined below, where applicable.

16.1 Handwashing

- Wash hands with liquid soap and warm water, and dry with paper towels
- Always wash hands after using the toilet, before eating or handling food, and after handling animals
- Cover all cuts and abrasions with waterproof dressings

16.2 Coughing and sneezing

- Cover mouth and nose with a tissue
- Wash hands after using or disposing of tissues
- Spitting is discouraged

16.3 Personal protective equipment

- Wear disposable non-powdered vinyl or latex-free CE-marked gloves and disposable plastic aprons where there is a risk of splashing or contamination with blood/body fluids (for example, nappy or pad changing)
- Wear goggles if there is a risk of splashing to the face
- Use the correct personal protective equipment when handling cleaning chemicals

16.4 Cleaning of the environment

- Clean the environment frequently and thoroughly
- Clean the environment, including toys and equipment, frequently and thoroughly

16.5 Cleaning of blood and body fluid spillages

- Clean up all spillages of blood, faeces, saliva, vomit, nasal and eye discharges immediately and wear personal protective equipment
- When spillages occur, clean using a product that combines both a detergent and a disinfectant and use as per manufacturer's instructions. Ensure it is effective against bacteria and viruses and suitable for use on the affected surface
- Never use mops for cleaning up blood and body fluid spillages – use disposable paper towels and discard clinical waste as described below
- Make spillage kits available for blood spills

16.6 Laundry

- Wash laundry in a separate dedicated facility
- Wash soiled linen separately and at the hottest wash the fabric will tolerate
- Wear personal protective clothing when handling soiled linen
- Bag children's soiled clothing to be sent home, never rinse by hand

16.7 Clinical waste

- Always segregate domestic and clinical waste, in accordance with local policy
- Used nappies/pads, gloves, aprons and soiled dressings are stored in correct clinical waste bags in foot-operated bins
- Remove clinical waste with a registered waste contractor
- Remove all clinical waste bags when they are two-thirds full and store in a dedicated, secure area while awaiting collection

16.8 Animals

- Wash hands before and after handling any animals
- Keep animals' living quarters clean and away from food areas
- Dispose of animal waste regularly, and keep litter boxes away from pupils
- Supervise pupils when playing with animals
- Seek veterinary advice on animal welfare and animal health issues, and the suitability of the animal as a pet

16.9 Pupils vulnerable to infection

Some medical conditions make pupils vulnerable to infections that would rarely be serious in most children. The school will normally have been made aware of such vulnerable children. These children are particularly vulnerable to chickenpox, measles or slapped cheek disease (parvovirus B19) and, if exposed to either of these, the parent/carer will be informed promptly and further medical advice sought. Advise these children to have additional immunisations, for example for pneumococcal and influenza.

16.10 Exclusion periods for infectious diseases

The school will follow recommended exclusion periods outlined by Public Health England, summarised in appendix 3.

In the event of an epidemic/pandemic, we will follow advice from Public Health England about the appropriate course of action.

17. New and expectant mothers

Risk assessments will be carried out whenever any employee or pupil notifies the school that they are pregnant.

Appropriate measures will be put in place to control risks identified. Some specific risks are summarised below:

- Chickenpox can affect the pregnancy if a woman has not already had the infection. Expectant mothers should report exposure to antenatal carer and GP at any stage of exposure. Shingles is caused by the

same virus as chickenpox, so anyone who has not had chickenpox is potentially vulnerable to the infection if they have close contact with a case of shingles

- If a pregnant woman comes into contact with measles or German measles (rubella), she should inform her antenatal carer and GP immediately to ensure investigation
- Slapped cheek disease (parvovirus B19) can occasionally affect an unborn child. If exposed early in pregnancy (before 20 weeks), the pregnant woman should inform her antenatal care and GP as this must be investigated promptly

18. Occupational stress

We are committed to promoting high levels of health and wellbeing and recognise the importance of identifying and reducing workplace stressors through risk assessment.

Systems are in place within the school for responding to individual concerns and monitoring staff workloads.

19. Accident reporting

18.1 Accident record book

- An accident form will be completed as soon as possible after the accident occurs by the member of staff or first aider who deals with it. An accident form template can be found in appendix 2
- As much detail as possible will be supplied when reporting an accident
- Information about injuries will also be kept in the pupil's educational record
- Records held in the first aid and accident book will be retained by the school for a minimum of 3 years, in accordance with regulation 25 of the Social Security (Claims and Payments) Regulations 1979, and then securely disposed of

19.2 Reporting to the Health and Safety Executive

The Health and Safety officer will keep a record of any accident which results in a reportable injury, disease, or dangerous occurrence as defined in the RIDDOR 2013 legislation (regulations 4, 5, 6 and 7).

The Health and Safety officer will report these to the Health and Safety Governor as soon as is reasonably practicable and in any event within 10 days of the incident.

Reportable injuries, diseases or dangerous occurrences include:

- Death
- Specified injuries. These are:
 - Fractures, other than to fingers, thumbs and toes
 - Amputations
 - Any injury likely to lead to permanent loss of sight or reduction in sight
 - Any crush injury to the head or torso causing damage to the brain or internal organs
 - Serious burns (including scalding)
 - Any scalping requiring hospital treatment
 - Any loss of consciousness caused by head injury or asphyxia
 - Any other injury arising from working in an enclosed space which leads to hypothermia or heat-induced illness, or requires resuscitation or admittance to hospital for more than 24 hours
- Injuries where an employee is away from work or unable to perform their normal work duties for more than 7 consecutive days
- Where an accident leads to someone being taken to hospital
- Where something happens that does not result in an injury, but could have done

- Near-miss events that do not result in an injury, but could have done. Examples of near-miss events relevant to schools include, but are not limited to:
 - The collapse or failure of load-bearing parts of lifts and lifting equipment
 - The accidental release of a biological agent likely to cause severe human illness
 - The accidental release or escape of any substance that may cause a serious injury or damage to health
 - An electrical short circuit or overload causing a fire or explosion

Information on how to make a RIDDOR report is available here:

[How to make a RIDDOR report, HSE](http://www.hse.gov.uk/riddor/report.htm)

<http://www.hse.gov.uk/riddor/report.htm>.

20. Training

Our staff are provided with health and safety training as part of their induction process.

21. Monitoring

This policy will be reviewed and approved by the Governing Body every year.

22. Links with other policies

This health and safety policy links to the following policies:

- First aid
- Risk assessment
- Supporting pupils with medical conditions
- Accessibility plan

Appendix 1. Fire safety checklist

Issue to check	Yes/No
Are fire regulations prominently displayed?	Yes
Is fire-fighting equipment, including fire blankets, in place?	Yes
Does fire-fighting equipment give details for the type of fire it should be used for?	Yes
Are fire exits clearly labelled?	Yes
Are fire doors fitted with self-closing mechanisms?	Yes
Are flammable materials stored away from open flames?	Yes
Do all staff and pupils understand what to do in the event of a fire?	Yes
Can you easily hear the fire alarm from all areas?	Yes

Appendix 2. Incident Report Form

This includes trespass, nuisance or disturbance on school premises, verbal abuse, sexual or racial abuse, threats, aggression, physical violence and intentional damage to personal property.

This form should be completed as fully as possible after an incident occurring (please use a continuation sheet if necessary). For an incident involving or witnessed by a pupil, a member of staff should complete the form on their behalf. However, any discussion between one witness and another should not precede completion of the form, as this might lead to allegations of collusion.

Date of incident _____

Day of week _____

Time _____

1. Member of staff reporting incident

Name _____

Work address (if different from school address) _____

Position _____

2. Personal details of person assaulted/verbally abused (if appropriate)

Name _____

Work address (if different from school address)/home address (if pupil)

Job /Position (if member of staff) _____

Age _____ Sex _____

3. Details of trespasser/assailant(s) (if known)

4. Witness(es) if any

Name _____

Address _____

Age (approx.) _____ Sex _____

Other information

Relationship between member of staff/pupil and trespasser/assailant, if any

5. Details of incident

- a) Type of incident (e.g. if trespass, was the trespasser causing the nuisance or disturbance and how; if assault, give details of an injury suffered, treatment received etc.)

b) Location of the incident (attach sketch if appropriate)

Other details: describe incident, including, where relevant, events leading up to it; relevant details of trespasser/assailant not given above; if a weapon was involved, who else was present

6. **Outcome:** (e.g. whether police called, whether trespasser was removed from premises under section 547; whether parents contacted; what happened after the incident; any legal action)

7. **Other information (to be completed as appropriate)**

a) Possible contributory factors

b) Is trespasser/assailant known to have been involved in any previous incidents YES/NO

c) Give date and brief details if (b) is known

d) Had any measures been taken to try to prevent an incident of this type occurring? If so, what? Could they be improved?

e) If no measures have been taken beforehand, could action now be taken? If so, what?

f) Name and contact details of police officer involved and incident number or crime reference number, as appropriate

g) Any other relevant information

Signed _____

Date _____

Please return as soon as possible to: **Head teacher**

CACFO UK Education Centre

40 Northwood Road

Thornton Heath

CR7 8HQ

Appendix 3. Accident report

Name of injured person		Role/class	
Date and time of incident		Location of incident	
Incident details			
<i>Describe in detail what happened, how it happened and what injuries the person incurred</i>			
Action taken			
<i>Describe the steps taken in response to the incident, including any first aid treatment, and what happened to the injured person immediately afterwards.</i>			
Follow-up action required			
<i>Outline what steps the school will take to check on the injured person, and what it will do to reduce the risk of the incident happening again</i>			
Name of person attending the incident			
Signature		Date	

Appendix 4. Recommended absence period for preventing the spread of infection

This list of recommended absence periods for preventing the spread of infection is taken from [non-statutory guidance for schools and other childcare settings](#) from Public Health England (PHE).

Rashes and skin infections

Infection or complaint	Recommended period to be kept away from school or nursery	Comments
Athlete's foot	None	Athlete's foot is not a serious condition. Treatment is recommended.
Chickenpox	Until all vesicles have crusted over	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to chickenpox. Chickenpox can also affect pregnancy if a woman has not already had the infection.
Cold sores (herpes simplex)	None	Avoid kissing and contact with the sores. Cold sores are generally mild and self-limiting.
German measles (rubella)*	Four days from onset of rash (as per " Green Book ")	Preventable by immunisation (MMR x2 doses). If a pregnant woman comes into contact with German measles she should inform her GP and antenatal carer immediately to ensure investigation.
Hand, foot and mouth	None	
Impetigo	Until lesions are crusted and healed, or 48 hours after starting antibiotic treatment	Antibiotic treatment speeds healing and reduces the infectious period.

Measles*	Four days from onset of rash	Preventable by immunisation (MMR x2 doses). Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to measles. Measles during pregnancy can result in early delivery or even loss of the baby. If a pregnant woman is exposed she should immediately inform whoever is giving antenatal care to ensure investigation.
Molluscum contagiosum	None	A self-limiting condition.
Ringworm	Exclusion not usually required	Treatment is required.
Roseola (infantum)	None	
Scabies	Child can return after first treatment	Household and close contacts require treatment.
Scarlet fever*	Child can return 24 hours after starting appropriate antibiotic treatment	Antibiotic treatment is recommended for the affected child.
Slapped cheek syndrome/fifth disease (parvovirus B19)	None (once rash has developed)	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to parvovirus B19. Slapped cheek disease (parvovirus B19) can occasionally affect an unborn child. If exposed early in pregnancy (before 20 weeks), inform whoever is giving antenatal care as this must be investigated promptly.

Shingles	Exclude only if rash is weeping and cannot be covered	Can cause chickenpox in those who are not immune, i.e. have not had chickenpox. It is spread by very close contact and touch. If further information is required, contact your local PHE centre. Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. These children are particularly vulnerable to shingles. Shingles can also affect pregnancy if a woman has not already had chickenpox.
Warts and verrucae	None	Verrucae should be covered in swimming pools, gymnasiums and changing rooms.

Diarrhoea and vomiting illness

Infection or complaint	Recommended period to be kept away from school or nursery	Comments
Diarrhoea and/or vomiting	48 hours from last episode of diarrhoea or vomiting	
E. coli O157 VTEC Typhoid* [and paratyphoid*] (enteric fever) Shigella (dysentery)	Should be excluded for 48 hours from the last episode of diarrhoea. Further exclusion may be required for some children until they are no longer excreting	Further exclusion is required for children aged 5 years or younger and those who have difficulty in adhering to hygiene practices. Children in these categories should be excluded until there is evidence of microbiological clearance. This guidance may also apply to some contacts who may also require microbiological clearance. Please consult your local PHE centre for further advice
Cryptosporidiosis	Exclude for 48 hours from the last episode of diarrhoea	Exclusion from swimming is advisable for two weeks after the diarrhoea has settled

Respiratory infections

Infection or complaint	Recommended period to be kept away from school or nursery	Comments
Flu (influenza)	Until recovered	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. It may be advisable for these children to have additional immunisations, for example pneumococcal and influenza.
Tuberculosis*	Always consult your local PHE centre	Some medical conditions make children vulnerable to infections that would rarely be serious in most children, these include those being treated for leukaemia or other cancers. It may be advisable for these children to have additional immunisations, for example pneumococcal and influenza.
Whooping cough*	Five days from starting antibiotic treatment, or 21 days from onset of illness if no antibiotic treatment	Preventable by vaccination. After treatment, non-infectious coughing may continue for many weeks. Your local PHE centre will organise any contact tracing necessary.

Other infections

Infection or complaint	Recommended period to be kept away from school or nursery	Comments
Conjunctivitis	None	If an outbreak/cluster occurs, consult your local PHE centre.

Diphtheria*	Exclusion is essential. Always consult with your local HPT	Family contacts must be excluded until cleared to return by your local PHE centre. Preventable by vaccination. Your local PHE centre will organise any contact tracing necessary.
Glandular fever	None	
Head lice	None	Treatment is recommended only in cases where live lice have been seen.
Hepatitis A*	Exclude until seven days after onset of jaundice (or seven days after symptom onset if no jaundice)	In an outbreak of hepatitis A, your local PHE centre will advise on control measures.
Hepatitis B*, C*, HIV/AIDS	None	Hepatitis B and C and HIV are bloodborne viruses that are not infectious through casual contact. All spillages of blood should be cleaned up immediately (always wear PPE). When spillages occur, clean using a product that combines both a detergent and a disinfectant. Use as per manufacturer's instructions and ensure it is effective against bacteria and viruses and suitable for use on the affected surface. Never use mops for cleaning up blood and body fluid spillages – use disposable paper towels and discard clinical waste as described below. A spillage kit should be available for blood spills.
Meningococcal meningitis*/ septicaemia*	Until recovered	Meningitis C is preventable by vaccination There is no reason to exclude siblings or other close contacts of a case. In case of an outbreak, it may be necessary to provide antibiotics with or without meningococcal vaccination to close school contacts. Your local PHE centre will advise on any action is needed.
Meningitis* due to other bacteria	Until recovered	Hib and pneumococcal meningitis are preventable by vaccination. There is no reason to exclude siblings or other close contacts of a case. Your local PHE centre will give advice on any action needed.

Meningitis viral*	None	Milder illness. There is no reason to exclude siblings and other close contacts of a case. Contact tracing is not required.
MRSA	None	Good hygiene, in particular handwashing and environmental cleaning, are important to minimise any danger of spread. If further information is required, contact your local PHE centre.
Mumps*	Exclude child for five days after onset of swelling	Preventable by vaccination
Threadworms	None	Treatment is recommended for the child and household contacts.
Tonsillitis	None	There are many causes, but most cases are due to viruses and do not need an antibiotic.

* denotes a notifiable disease. It is a statutory requirement that doctors report a notifiable disease to the proper officer of the local authority (usually a consultant in communicable disease control). In addition, organisations may be required via locally agreed arrangements to inform their local PHE centre. Regulating bodies (for example, Ofsted/Commission for Social Care Inspection (CSCI)) may wish to be informed.
